JOURNAL OF COMPUTERS

ISSN: 1991-1599 Volume 37 Number 5 October 2026

CONTENTS

Development of Wildlife Identification System Based on Local Alignment Algorithm 1

Da-Wei Liu, Peng-Bo Zhao, Yong-Wu Zhou, Sheng-Wen Zhou, Jun-Chi Xiao, Bo-Yang Fu, Yi Liang, Shu-Ming Huang, and Ming-Yue Qiu

Research on Warehouse Path Planning for Logistics Robots Based on Improved Whale Optimization Algorithm 13

Shizheng Liu and Xinnan Ji

Collaborative Prediction Algorithm for Investment and Financing Network System Based on Improved Hypergraph Convolution and Ant Colony Algorithm 27

Cailiang Jiang

Credit Evaluation Model Based on Adaptive Synthetic and Grey Wolf Optimization Improved XGBoost Algorithm 43

Zhanjiang Li and Zheng Chong

Research Progress on Multimodal Named Entity Recognition with Multi-Task Learning 59

Fangping Chen, Yanbo Jia, Hairong Wang, and Zaiyuan Zhao

Research on Scheduling Strategy of Wind-Solar-Thermal-Storage System Based on MNSGA-II 75

Yun Wu, Kai Yang, Yan Du, Jie-Ming Yang, Zi-Yi Wang, Ning An, Nan Xu, and Wen-Han Zhao

A Differentially Private Stacked Denoising Autoencoder-Based Fingerprint Localization Model in a Cloud Environment 89

Xuejun Zhang, Hui Chen, and Chengze Li

A Multi-Strategy Optimized Dung Beetle Algorithm 107
Jiaoli Xu and Yang Liu

Implementation of an Effective Code Vulnerability Detection Model Using Deep Learning and Attention Mechanism 131
Er-Zhou Zhu, Le-Hao Qi, Jia-Qi Chang, and Zhu-Juan Ma

Construction and Empirical Research on Classroom Teaching Evaluation Model of Vocational Education Based on Artificial Intelligence Multimodal Data Fusion .. 153
Chunxia Lan

GDN-Based Dependency Task Offloading for Latency-Sensitive Vehicular MEC Networks 165
Ruijun Bai

Transformer-KF Aided Sparse mmWave Channel Estimation for Complex Dynamic Scenarios 183
Jiancheng Chen

Research on Key Success Factors of Building Sensor-based MES System in Intelligent Manufacturing Environment 203
Xiao-Zhong Chen, Rong-Li Chen, Lei Wang, Jianxin Li, and Zhijie Chen

Dynamic Optimization of Personalized English Learning Ability Enhancement Methods Driven by Reinforcement Learning 217
Xiang Zhao and Xinhua Guo

Uncertain Probabilistic Machine Learning Algorithm for Scene Classification of Humanoid Robot 241
Shu-Qiong Xu, Cong-Gui Yuan, and Shu-Ting Cai

Financial Crisis Prediction Model of Listed Companies Based on Financial Network Indicators 255
Ju Xu

Construction of Secure Data Sharing Strategies and Incentive Mechanisms for Industrial Internet of Things Based on Digital Twin 269
Xiao-Jing Guo, Cheng-Fang Mei, Meng-Ying Yang, and Yuan Yuan

Research on the Dynamic and Communication Mode of Public Opinion Emotions Based on Text Mining and Sentiment Analysis 287
Chao-Peng Li, Li-Ning Hao, Jiang Shang, Xin-Yuan Wang, Jing-Wen Zhao, and Yan-Ming Zhang

Design of an Adaptive English Vocabulary Learning System Based on Fuzzy Modeling of Second Language Vocabulary Features 303
Jia-Rong Xu, Dan-Hong Qiao, Li-Juan Zhao, Ke-Xin Liu, and Shi-Xiao Yan

A SHAP-Based Nonlinear Analysis Approach to Audit Identification of Patient Capital 321
Qing-Yun Zhao, Jing-Jing Yang, and Ya-Ting Lu

DDS-Based Perception and Control System for Plateau Obstacle Removal Vehicles 339
Meihui Chen, Zhenjiang Zhang, Ling Zhou, and Yawei Lv

Research on the Fitness for Duty of Public Transport Drivers Based on Micro-expression Recognition 357
Ying-Si Zhao, Gulipiyan Ainiwan, and Wen-Hao Ye

Optimization of Financial Budget and Design of Budget System for Vocational Colleges Based on Data Analysis 373
Kai-Hua Li, Qiang Guo, Ya-Di Shi, and Xing-Jie Wang

Slotting Layout Optimization and Dynamic Scheduling Method for Smart Warehousing Systems 391
Qing-Chuan Liu, Rui Fan, Shao-Kun Wu, Jun-Xia Cui, and Li-Ming Ma

Deep Learning-Based Welding Process Optimization and Adaptive Control Method for Welding Robots 409
Hai-Tao Li, Xiao-Long Tian, Peng Zhang, Feng Yang, Tao Wang, and Ci-En Li

Secure Sharing Governance of User-Generated Content in Blockchain-enabled Virtual Communities 427
Jian-Chun Sun, Ying Yue, and Ai-Jing Xiao

Leveraging Mamba for Enhanced Multimodal Few-Shot Action Recognition 443
Zhaochuan Wei, Rongtian Yang, Xiaodong Cai, and Yuanfa Ji
